At a time of US commercial and military ascendancy and with new leadership and priorities following the November elections, ComDef 2001 will consider the options available and how the world can be made safer.

The conference will look into new threats to peace and relationships with nations of concern. Aging equipment inventories and the ability of industrial bases of friendly nations to modernize existing equipment will also be addressed.

ComDef 2001 offers a glimpse into the future of defense at a key moment in history, and will provide opportunities for international networking with government, military, & industry leadership.
